

“The
Sturdiest
Build”

11.3 cu. yd. 150 - 450 HP

the
NEW
GENERATION
I-110TS2

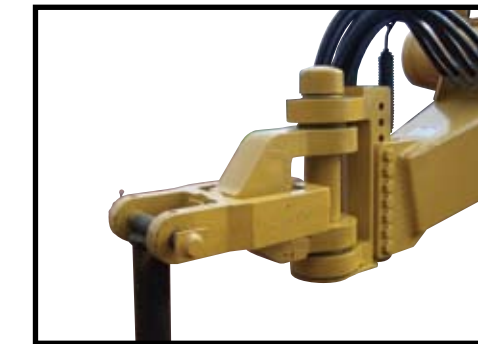

CONSISTENT

The I-110TS2 is built to last.

- 97.5" width of cut and front lift control over the blade set makes the I-110TS2 easy to load.
- The push-off's heavy duty frame and trolley system are powered by a large 4" x 54" welded hydraulic cylinder.
- The dual plated floor is designed to handle the toughest conditions.
 - The standard 56" apron clearance ejects loads our competitors often choke on.
 - Rugged push bar extension.
 - Excellent visibility of blade while loading.
