

Ability to work in wet conditions

11.3 cu. yd. 175 - 350 HP

# the NEW GENERATION I-110XL2

rugged BUILD

STRENGTH

## Why will the I-110XL2 work for you?

- The dolly wheel doesn't require a special hitch allowing you the freedom to use multiple power units.
- Large 56" Apron opening easily ejects all types of material.
- Dolly wheel doesn't transfer weight onto the power unit, making it ideal for small dozers or MFWD tractors.

## RELIABLE

### What makes the I-110XL2 so strong?

- The 90" front pole and step down axles provide excellent turning clearances.
- The rugged 36" wide pushbar is standard on all XL2 models.
- The 4-1/4" spindles are raised above the ball providing a lower pulling point, which translates into a smoother cut and larger loads.
